

The Reliability Leader For Over 11 Years

EK-Logictrol radios have earned an unsurpassed reputation of reliability since 1964. Sound engineering principles were applied in the days of the Log 1 and continued thru the Log 11, Pro-Series, right into the present day line. This carefully controlled process of development is time proven by the vast number of older systems still in service today. It also guarantees that you are not part of an "experimental test group", so when you want to fly - Buy EK!

**EK-Logictrol Has Always Been The
Lowest Cost Highest Value
Radio In The World!**
