National Miniature Pylon Racing Association • Since 1965 • AMA Affiliated • February 2007

Presidential Notes

Hello everyone,

We have a whole new year to try to improve our building and flying! Are you ready to take it on? Some of you have already started with the Winterfest contest at Speedworld near Phoenix; my first meet will be the Q-40 Classic next month at the same site as Winterfest; the dates are February 23rd through the 25th. If you're thinking about attending and haven't secured hotel rooms, you should hurry and do so as the hotels are filling fast.

As to Winterfest, I understand it went well even though the weather wasn't the best; wow, they had snow! Congratulations to Tom Skavinsky for first place and fast time in ARPA. Congratulations and a well done to Gary Schmidt winning AMA 428; Lee Von Der Hey took fast time.

I noticed the dates given for the F3D competition in an article in the current Model Aviation are incorrect. According to the schedule on the AMA web site, the correct dates are as follows. F3D will be June 23rd thru the 28th, and the AMA pylon NATS will be June 29th thru July 4th. July 4th is a Wednesday; that's different as we normally finish on a Friday. I look forward to seeing you there.

For those of you who are unaware, a long-time member Jake Jacobson is currently being treated for lung cancer. He has completed about 50% of the chemo treatments and seems to be responding well. Our thoughts and prayers go out to you, Jake; get well soon.

NEW MEMBERS

I want to welcome and recognize the following new members. If you know them, please be sure to thank them for joining the NMPRA and helping to support pylon racing. We need more members, both young and not so young.

Alex Richmond of Gig Harbor, WA
Martin Scott of Taft, CA

I also want to recognize the following members who are returning after a few years or, as in at least one case, after many years.

Tom Pownell of Malabar, FL

Charlie Krueger of Ocala, FL

Brian Richmond of Gig Harbor, WA

Thanks for joining us, folks.

Speaking of our membership, as I look over some of the race results that we published in the last newsletter, I am amazed at the number of people listed who are not NMPRA members. How can we get them to join us? Would it help to make applications available at some of the contests around the nation?

While I'm mentioning membership, have you sent your dues in? Jesse Hall has, and he included a donation to the FAI team; Jesse has donated to the FAI team for many years. Thanks, Jesse!

RULES, RULES, RULES!!

You know what they are; just follow them. It will be more fun for everyone!

NATIONAL POINTS

We published the final results in the last newsletter; well, we thought they were final, but it seems some race results weren't received and a few were over-looked. So, we now have the final, final results in, and they are listed elsewhere in this issue. The shirts for the top 20 in AMA 422, 424, and 428 are on order as are the jackets for the top five in the Championship Series. Also, after much thought, I have decided to award the top three in AMA 422, 424, and 428 \$300.00, \$200.00, and \$100.00. This way they can spend it on what they need rather than getting a kit or engine they don't need. Congratulations to all and thanks for competing.

NMPRA CHAMPIONSHIP RACE SERIES FOR 2007

I am pleased to announce that the folks in Wichita Falls, TX, wish to host a race this year on August 17th thru the 19th. We were there this past year, and the flying site is one of the best around. I hope you can join us this year.

I also want to thank Darrol Cady for joining in to help sponsor the Q-40 Championship Series. Thanks, Darrol.

Phoenix, AZ

February 23rd thru 25th

Ft. Lauderdale, FL

April 20th thru 22rd

Bowie, MD

June 8th thru 10th

Wichita Falls, TX

August 17th thru 19th

I'm still looking for a host for the Q-40 Championship Race; the Championship Race should be on the east coast in 2007.

EVENT CALENDAR

Stan Douglas, our web master, has set up a calendar program on the web site so that each district V.P. can input his or her district schedule for all to see. I believe this will be a big plus for us, but it will be only as good as the input to the calendar; be sure your district V.P. has the information he or she needs.

That's it for this issue. I wish you the best in your racing endeavors. I look forward to seeing many of you in Phoenix!

Bob Brogdon

District 1, Travis Flynn

Happy New Year, District One. Well, I am just starting to warm up after an unbelievably cold weekend in Phoenix, Arizona, where over 60 of us competed at the 2007 Winterfest Q500 race. I have been going to the Winterfest race for over a dozen years, and I can say undoubtedly that this was the coldest, wettest one yet. Even though the temps were in the 40's, the Phoenix club and workers did a fantastic job still getting us 7 rounds of racing. I think even in perfect weather the plan was to go only 8 rounds so we can't thank them enough.

Now to the racing action. This year it seemed that we had some new faces, including a whole group from District 2. Some of these guys have been here before, but they seemed to be

more in force this year. I don't think I have seen Eric Ide before, but he was hanging tough with a lot of the top guns and flying great. Another guy that I think is officially hooked is Scott Causey, who is an RC combat pilot and friend of AJ Seaholm. I saw him already eying a Q40. It also looks as if we have a new guy from our district or I guess I should say returning to it: George Peiro, he and his brother looked as if they had a good time even in the cold weather.

I'll start with AMA 428. After four rounds of racing Saturday the standings were very close with many guys only one or two points down. Sunday things would change though. After rounds five and six many guys had a few cuts and even a few more with the dreaded double cut and collecting the zero. So after the seventh round Gary Schmidt was on top, down only one point (to Scott McAfee) and received the big Kachina trophy. Jim Allen and Randy Bridge were tied for second and third, and after a fly-off Jim got the second spot. The fourth through eighth spots were also tied for points. So after some discussions with the five pilots, the decision was to race it as the drags do and have an A/B format fly-off. The fast guy flies the slow guy. So Craig Grunkemeyer and Gino Del Ponte raced first with Gino winning and advancing. Next would be Fred Burgdorf, Matias Salar, and Lee Von Der Hey. Lee lost his plane in the first few laps so Fred and Matias finished it to the end with Matias coming out on top. Now to the final fly-offs, which started with the B group and the sixth and seventh place which included Fred and Craig. Lee would have been in this, but losing his plane, he didn't take out a backup so he got the eighth spot and also the fast time trophy. In the race Craig got one cut, and Fred took the win. Now the A group of Matias and Gino would fly-off for the fourth and fifth spot. These guys had a very close race with Matias coming out on top. These were very cool fly-offs to watch, and these five guys got a few more flights in for sure.

High Performance Information

High Performance is published 6 times per year. Information for publication can be forwarded to:

NMPRA Editor, Linda Brogdon
5251 Hermitage Dr.
Powder Springs, GA 30127
Phone: (770) 421-8838
Email: brogdonlh@comcast.net

If possible, please submit information in Microsoft Word format

Race Announcement Policy

High Performance will publish announcements of upcoming races free of charge, on first come, and space available basis. Also, camera ready copy no larger than 7.5" wide by 2.5" high (border dimension). Copy must be received by the Editor no later than the announced due date.

Advertising Rates

Rates are for camera ready artwork. Artwork, composition and typesetting will be charged at cost. Printable are 7.5"x10", lpi=133, halftone permitted. Ads for upcoming issues must be received by the deadlines published below.

Size	Single	Annual
Full Page 7.5"x10"	\$ 50	\$ 275
1/2 Page 7.5"x5"	\$ 35	\$ 180

District News

Now to 424 which had a good turn out for this race. They too had some new faces make the trip including Martin Scott, Danny Courtier, and Matt Russell's daughter Alexandria made it out again. It's great to see more people making this race. These guys and girl got in five rounds on Saturday with the final two on Sunday. There was one fly-off with Tom Graves and Tim Strom for third and fourth with Tom taking the win. The winner of the event was Tom Skavinsky who also got the fast time. Martin Scott was close and only one point behind Tom. Good job, guys.

After the racing it was time to hand out the famous Kachina trophies to the top seven in 428 and the top three in 424. We got finished just in time because only a few minutes after the trophies were given out, it actually started to snow!! Can you believe it snowed in Phoenix? That was just a perfect end to a cold weekend.

One pretty cool thing about the weekend was the handful of guys who were using the new Spektrum DX7 radio system. This was the first pylon event where they were used. I personally liked not having to worry about frequency conflicts during practice. I think the 2.4 GHz is going to be the wave of the future, especially when all the rest of the radio manufacturer's systems become available.

Here is the list of all the winners for the Winterfest race:

424

- 1st Tom Skavinsky F/T 1:36.09
- 2nd Martin Scott
- 3rd Tom Graves

428

- 1st Gary Schmidt
- 2nd Jim Allen
- 3rd Randy Bridge
- 4th Matias Salar
- 5th Gino Del Ponte
- 6th Fred Burgdorf
- 7th Craig Grunkemeyer
- 8th Lee Von Der Hey F/T 1:06.75

Anyway this month's article is pretty short since there hasn't been much racing going on yet. Our next race will be the Phoenix Q40 Classic February 24th and 25th. The next Q500/Q40 race isn't until April 21st and 22nd, but I am not sure if this is locked yet, and this will be at the Sepulveda Basin.

Until next time, keep practicing!

Travis

Pictures from Winterfest

District 2, Dan Nalley

Thank you to Jim Allen and all the hard workers at Speedworld who put on another stellar race (despite the weather) at Winterfest 2007. There are sure to be many race reports in

this issue of the NMPRA newsletter, so we will just say that there was a great turnout from the Northwest. Congrats to our top performer – Eric Ide. The competition was great as expected; 2800 miles (roundtrip) is a long way to drive for a quickie race, but well worth it!

The question was posed a while back by our esteemed leader Bob Brogdon to find out what our NMPRA members wanted and hoped for from our NMPRA leadership. After surveying many in District 2, the overwhelming wish is simple but repeated – a better and more updated NMPRA website. Communication of race happenings, results, and information seems to be key. Fortunately, many of those things requested are already in the works – an up-to-date and current website with race calendars and results that are accessible to all members. We hear you and are working on that as you read this.

The upcoming races for our area will be listed in every District 2 newsletter section. For this newsletter those races are

- February 11th Shelton, WA
– APRA & 428
- March 11th Shelton, WA
– APRA & 428
- April 22nd Shelton, WA
– APRA & 428
- May 19th & 20th Spokane, WA –
APRA & 428 & Q40
- June 9th & 10th Whidbey Island, WA
– APRA & 428 & Q40

These are not all the races for 2007, just the upcoming. For a more complete race schedule you can visit www.nwprops.org. If you need additional information on any of these races, feel free to contact me directly at dan@wininfo.com or 425-271-5268. In non-ylon news, the NW Model Expo is no longer happening in Puyallup, WA. There has been another group of modelers who have

NMPRA Q-40 Championship Series

stepped in to bring another event to the modeling community. The “New” NW Model Expo will be held at the Evergreen State Fairgrounds, Monroe, WA, March 24 & 25th. There will be manufacturers represented, a swap shop, and more. For more information you may contact newnwexpo@yahoo.com .

Looking forward to a great racing season in District 2 and around the country!

Dan Nalley
NMPRA District 2 VP

District 3, Richard Moldenhauer

Hello, everyone. It’s another cold, snowy winter in Canada with racing pretty much shut down. So what to write for Linda’s newsletter this time around? How about a little building tip. Building? Who does that any more? I guess it’s more of an assembly tip since most of our models these days are highly prefabricated.

My assembly tip comes with some good advice and words to the wise (or perhaps words to the dumb and dumber...) The morale of this story is to keep the friggin’ bottle of CA well away from the aileron torque rods. Yes, I did it. Even after saying to myself, “Now be very careful not to get any CA on the torque tube...”; somehow it just finds the closest, most direct line to disaster and frustration.

I speak of my brand new Q40 Polecat. I had heard that it is a good idea to soak the wing mounting blocks inside of each wing panel with CA to ensure any punky wood in this area is hardened so that pressure applied by the wing bolts will not crush or collapse the wing panel. I have since discovered that this is likely not necessary on Bruce’s Polecats now, but maybe it was a good idea on early ones. Anyway, my story (and the lesson) continues...

So I have a brand new 2 oz. bottle of thin CA. I clip off the end of the

applicator nozzle and proceed to go to work...all the while repeating, “Now be very careful not to get any CA on the torque tube...” Starting at the front block, I begin to apply a liberal amount of thin CA to the target area. All is well. Things begin to smoke and vapor gets in my eyes. It now begins to go downhill from here.

Confident that my application technique is second only to similar skills of a brain surgeon, I move to the rear blocks. At this point the dreaded CA Demons of Modeling descend upon my workshop and my very first brand-new Polecat. Against all laws of physics, except perhaps capillary action, the CA finds its way to the brass torque tube. At first, Denial floods the brain cells, and the delicate application of more CA continues. Then Realization of what has actually happened pushes Denial from the rapidly firing neurons in my brain. Then Panic quickly sets in...I drop the bottle of CA to the floor and begin frantically moving the aileron back and forth to reinforce the Denial that says, “You didn’t get CA in the torque tube, did you?” Within seconds of trying to make everything Okie-Dokie by rapidly flexing the aileron back and forth, the force required to continue said flexing action quickly increases. The torque tube begins to squeak, and all movement rapidly comes to a grinding halt. Anger now fills the air of the workshop, and the house cat runs for the hills as a blood curdling scream is heard throughout the land. “NO...OOOOOOO.....!!!”

Before opening my wallet and emailing Bruce for a new wing panel, I take a few deep breaths and step away from the work bench. Perhaps this problem, which is clearly the fault of the CA Demons of Modeling, can be solved by some creative engineering, a sharp Dremel tool, and some acetone.

If you have read this far, you have reached my assembly tip. To solve

the above “Welded Aileron” problem, simply cut through the surface of the wing panel with a small Dremel bit and open up the aluminum torque tube so that it looks like a “C” shape along its entire length. Apply acetone to the opening in the tube with a syringe and begin to work the aileron back and forth. One or two beers and lots of patience will yield a relatively free aileron. The dried CA will dissolve and turn goopy and then make its way to the opening in the tube. Scrape away the CA residue with an Exacto knife or a small brass brush. Finally, apply a liberal amount of silicone based spray lubricant to the opening in the tube. Open another beer, and continue wiggling the aileron back and forth. Problem solved; Demons gone. The scars of the wing surgery can be almost entirely hidden by the Polecat canopy and a little tape if you can color match some tape to your paint job. In my case, the affected area is white so some white tape did the job nicely.

District News

Moral of this story once again: "Keep the friggin' bottle of CA well away from the aileron torque rods" and "Do as I say, not as I do."

Randy Smith

District 4, John Williams – no article submitted

District 5, Bernie Vanderleest

Most of District 5 has some snow coverage right now so the 2007 season is still a ways off. The 2006 season was a good one in District 5 with new races being added and some new pilots joining the action. There are three active racing groups in the district: the North Central Pylon League (NCPL) in the Twin Cities area, the Wisconsin & Illinois Pylon Racing Organization (WIPRO), and the Can-Am Pylon Society (CAPS).

As we all know, there are always a few key people who take the initiative to make the races possible. I would like to acknowledge some of those in District 5 who helped make the 2006 season such a success.

Terry Frazer organized the season opener for CAPS in Lucasville, OH. Tom Scott organized the Cincinnati, OH race. Arch Adamisin and Kevin Matney organized the Toledo, OH race. Ben Martin organized the Dayton, OH race. Mike De Neve, Ray Hendricksma, and Ed Smith organized the final CAPS race at the AMA site in Muncie, IN. Most of you across the country are familiar with the work Mike Condon does as the Nationals Pylon Event Director.

Mick Warning, Mark Warning, and George Reynolds organized the WIPRO races in Hilbert, WI. Orv Steinmetz and Ron Monk organized the races in Rockford, IL. Jim Hagner, Mike Kostecki, and Mel Ziska organized the season-ending races in St. Charles, IL.

I asked Dave Norman for help identifying some of the key people

behind the NCPL. He pointed out that there are too many to mention, but Jerry Bednark has made sure that the field is always ready to race. Jerry Elert gets the people out to race and has helped sponsor the races or supply lunch. Del Berryman is the stoic president of the organization that keeps internal feuds from escalating. Chuck Eldridge handles the website and all of the record keeping. Lee La Valley organized some new races in Amery, WI. Dave Norman, Randy Etken, Al Schwartz, Pat Galarneault, Phil Zuidema, Dick Steine, Dan Norlin, and Ron Gage are all long-time supporters of the races.

Beyond those listed there is the participation of the hosting clubs and numerous other volunteer workers. All of us who flew in the races in 2006 certainly appreciate the efforts of those who give us the events to race in. There is a lot of effort that goes into these races before, during, and after the race. Hopefully the participation will be just as good in 2007.

All of the 2006 point totals have now been calculated, and the season champions for the various District 5 racing groups are as follows:

CAPS 424 Q500

Kevin Matney

CAPS 428 Q500

Terry Frazer

CAPS 422 Q40

Craig Grunkemeyer

CAPS Overall Champion

Gary Helton

NCPL Sport Q500 (OS .46)

Randy Etken – Expert

Bill Hemple – Standard

NCPL 428 Q500

Randy Etken

NCPL 422 Q40

Dave Norman

WIPRO 424 Q500

Mick Warning

Congratulations to all these race pilots on a job well done.

That's about it for now. Get those new racers ready for 2007; the snow will be melting soon. The 2007 schedule is starting to take shape so keep an eye on the Event Schedule published on the NMPRA website. If you are planning a race in District 5, please send me the details. I will make sure that it gets posted on the NMPRA website. Details are also available on the group websites listed below.

Regards,

Bernie

CAPS – www.capsracing.com

NCPL – www.ncplracing.org

WIPRO – www.q500424.com

District 6, Steve Baker

Well, it's the dead of winter in the Northeast; we've just had our first ice/snow storm, and, all in all, model airplanes are way down my list of priorities. Much as I'd like to take one out and fly it, without a real reason to, it's just a formula for trouble.

I heard the South Carolina race was a great event with a large turnout in both 424 and 428. Congratulations to Neal Rehm for winning in 424. I also heard some of our other northern representatives (Rick Moreland and David Latsha) left their mark (more like divits) on the place but had a good time in spite of themselves. We are lucky to have another club in our region hosting contests, and I hope to support the South Carolina schedule in 2007.

The pylon racers of the PRGC club will meet soon to iron out the 2007 racing schedule. The shifted Nats schedule may impact our racing schedule a little. So far, we're planning to host the Bowie installment of the Q-40

District News

Championship Series (formerly known as the JR Gold Cup Series) for June 8-10 of 2007. This date has already impacted another region's schedule, but I hope they can adjust.

Until next time, keep building and innovating.

Steve Baker
District 6 VP

District 7, Tom Dobyms

In December we held our annual Tangerine event that this year became the Cliff Telford Memorial Race. With pleasantly warm weather and only 15-20 mph winds from the south, it was an unusually nice weekend to hold the race, as it is usually cold and windy during this time of year. Mama Nancy Telford was there all three days to help announce and hand out the awards on Saturday. It was great to see her smiling face at such a special event. I found out one reason she has such a big smile, her new little red sports car!! I was lucky enough to be her chauffeur for the nice evening parties that we attended on Friday and Saturday night... it is sweet!

We haven't set a date yet for the 2007 race, but I hope everyone who came this year and those who haven't been to the Tangerine before will come again this year. For those of you who do not know about this race, it is three days of racing for all 3 classes, 424, 428 & 422. We changed our format two years ago to the one we use now which is 424 race each day, 428 Friday and 1/2 day Saturday, and then 422 1/2 day Saturday and finishes on Sunday. With all of the attractions in the Orlando area, it is a great occasion to bring the family down for a vacation or at least let them go shopping. I know some of our friends from the northern states come down to enjoy our "warmer" weather and hot racing action.

This year Gary Freeman Jr. held a small party Friday night at his house,

which was a good prelude to the O'Brien party on Saturday night! Those who attend these get-togethers, and everyone is invited, have a enjoyable time to just sit back and relax and catch up on what has been going on with your friends since you last saw one another. I thank the Freeman's and O'Brien's for giving us all this opportunity.

As I said earlier, the racing action was hot, and in 428 it was really contested with plenty of action and several close races, one after the other. The top three winners all had something very special in their past that gave their winning a special feeling. They all have had very close dealings with Cliff during the start of their racing careers and with their lives.

The first place winner, Stephen Vaclav, was not only influenced during his racing start by Cliff, but he was also the recipient of an AMA Scholarship. This is important because Cliff was not only instrumental in helping Steven get this award, but Cliff was also very instrumental in helping to get the scholarship awards started in the AMA. Soon Stephen will graduate with a BS in Mechanical Engineering.

The second place winner has been working with Cliff at races for as long as I have known him. Gary Freeman, Jr. and his family have been longtime friends with the Telford's, and he was Cliff's caller at races throughout many years. I know that, like me, Gary has also received a lot of sage advice from Cliff throughout the years, that I am sure has helped Gary choose the path for his life to travel on. J.D. Glass, who took third, had been helped by Cliff during his beginnings as a 424 racer and how he quickly worked his way up through the ranks. Here are the final race results from the whole race:
