## NMPRA HIGH PERFORMANCE

NATIONAL MINIATURE PYLON RACING ASSOCIATION • SINCE 1965 • AMA AFFILIATED • JUNE 2016

### President's Corner

by Dan Kane

#### 2016 NATS

The NATS registration is now open. You can find registration forms here:

<http://www.nmpra.net/>

You can also find the registration numbers here:

<http://www.modelaircraft.org/events/nats/regstats.aspx>

Take the time to register as soon as possible to avoid paying the late fees.

#### NMPRA Business

Presidential and Vice President nominations are still being accepted. All nominations are due to the Secretary/Treasurer in writing no later than September 15th. Voting will then take place shortly after 9/15.

2016 Hall of Fame nominations are now being considered. Stay tuned for the 2016 inductees.

Race dates: Please use the contest coordinator to plan major events. This year we potentially have conflicts with the Champ Race and the F3D team trials. Both on opposite coasts, and one event will impact the other. With everything we have going on, it is hard enough to find an open weekend, and having two major US events on different coasts one week apart is not good.

On a different note, I am encouraged by all the new names showing up at contests. Gil Lucero on the West Coast made the jump to Q40, and here in the Midwest we had Doug Scherrer, Bill Hiller, and Scott Farnsworth making the transition. Plus new faces in the quickeer ranks: Chuck and Taylor Thompson, Tony Seymore, Mike Ryken, and Dean Soleman. Keep up the hard work promoting pylon racing. Remember to help the guy sitting next to you!

#### Final Thoughts

It seems that with each newsletter we have some sadness to report. This month is no different. However, this time it affects me personally. My mother passed away on May 6th. She had struggled with the side effects of a stroke for over a year. It was her time, and she is now in peace. So this month I leave you with an Irish Blessing:

*Mothers hold their  
children's hands for just  
a little while... and their  
hearts forever.*

Until we meet again, may your turns be tight and fast,

Dan Kane

# NMPRA NEWS

## **NMPRA Matrix Software Modernization – Project Update**

(Chuck Andraka)

Over the past several months I have worked with the rest of the Matrix Software Committee to define areas for improvement in Paul Herman's matrix software. This is the software program that is used by many of the NMPRA clubs. Once the primary areas were defined, I began the process of working on the code. We decided that, due to the wide use of Paul's code, it would be best to stay with the overall code for best adoption rather than completely re-invent the wheel. Further, we are working towards the goal of releasing a working version to NMPRA clubs by early October of this year. Modernization of Paul's existing software will give us the best chance of achieving the goal.

The first step was to bring the code forward to modern software tools, as the compiler originally used was out of date. Employing modern coding tools helps tremendously in debugging and code maintenance. Fortunately, the import went fairly smoothly, with most features requiring no repairs. I broke the desired code changes into two categories: 1) Technical matrix improvements to the lane allocation and to the matrix rolling, and 2) User interface and usability improvements. For the Nats, I am focused on the first area and will utilize the improved tool to build the Nats matrices. I will work the user interface issues for the Champ Race and tool deployment.

Work to date has focused on matrix building steps that include the lane allocation and the matrix rolling. In addition, some new features have been incorporated:

In 3-lane races, the byes are preferentially put in lane 2, so that planned 2-man races start on the same flag.

A strong preference is put on placing all byes in the same lane, so bye vs. bye does not occur.

A mechanism is used to support auto leveling of pilot skill. A manual approach was used by some large races; this tool will reduce the work load.

Significant randomization is used to improve matrix allocation without auto-leveling.

A CD may designate a "lane 1 affinity" for himself, which helps in running a contest. This does not affect lane allocations, but rather swaps entire lanes after allocations.

Matrix rolling also has some improvements:

Back-to-back heats are virtually eliminated except in the very smallest races (3 or 4 rows, just cannot be avoided).

Duplicate pairings are delayed as long as possible.

Duplicate triplets are virtually eliminated.

When a pairing does duplicate, back-to-back rounds with such duplicates are avoided. In other words, if I raced Jim in round 5, I may have to race him again, but it won't be in round 6.

Add a Round" button will be implemented.

Finally, before the Nats I plan to implement a CSV file import and export function. This tool will allow direct input of a properly formatted excel file, rather than having to re-type everything in the tool. The big race CD's will love this! Further, export of results has two purposes. For the Nats, I'll be able to export the results from A and B matrices, then combine the top entries into one CSV and re-import to make the finals matrix! Another aspect will be a future ability to import a results file into the standings spreadsheet, reducing the work load on the standings tabulators and reducing the chance of errors.

This first round of improvements for the alpha prototype may not have a sexy look and feel, but should result in noticeable improvements in the matrix structure at the Nats. After the Nats, I will review the priority list for the user interface improvements.

-Chuck Andraka

Business Card	3.625"x 2.375"	\$10	\$45

## DISTRICT NEWS

### District 3: Randy Smith

Hi Guys and Gals,

There is still not much to report on in District 3. Our racing season begins June 4, 5 in Regina, Saskatchewan with 426 Quickie and Q40. We are hoping for good weather and a full complement of race course helpers. Both of these have been hard to come by in recent years.

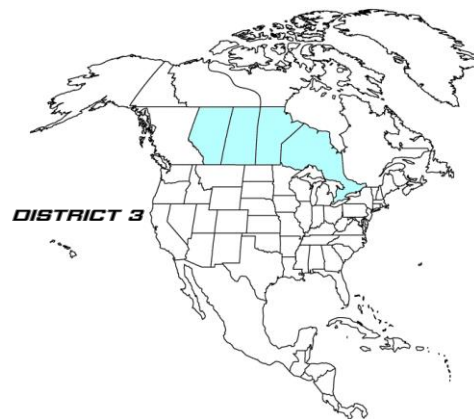

Following Regina two weeks later will be a 426/422 race in Edmonton. This will be the first time in many years that the ERCS Club in Edmonton will host a pylon race. We look forward to a great race and our chance to show the local club members the excitement that can be had in pylon racing.

The most exciting development recently is the release of the Quik-V6 Quickie 500 racer. The Quik-V6 is a foam core wing and woody fuselage ARF pylon racer designed like the Tesla Model 3 – AFFORDABLE FOR EVERYONE. The Quik-V6 is \$200.00

from Great Planes and Tower Hobbies. Recent scuttle-butt has it that Tim Lampe flew his Quik-V6 to a competition win in a fly-off against El Presidente, Dan Kane. Congratulations, Tim!

Personally, it's nice to see a competitive Q500 racer now on the scene. At the rate that I go through Q500s, I can now crash nearly three Quik-V6's to every Ninja. Woo-hoo!!! Congratulations to Jim Allen for getting his successful Quik-V6 to market with our hobby distribution partners. This is another way to grow pylon from the ground up.

Calgary's winter Club 20 racing wrapped up in May. Finally, Roy Andrassy was dethroned as Club 20 champion in Calgary. Delbert Godon was lurking in the weeds and came from behind to beat Roy in the final race of the year by one point. Congratulations, Delbert! Maria got tired of dusting that Club 20 trophy of Roy's anyway...

DISTRICT 3

The NMPRA Matrix software project is moving along. We are working towards an alpha release to be tested at the NATS in July. See my update near the end of Dan's President's message in this issue.

See you in the corners!  
Randy Smith

*Delbert Godon of Airdrie, Alberta captures the Winter Club 20 racing title in Calgary. Roy is nowhere to be seen...*

## District 5: Jim Nikodem

Anyone who skipped the Kansas City spring race due to the weather forecast missed a really good one. It was a little challenging with the tailwind, but the takeoff ramps worked well. Duane Hulen and the KCRC club did a real nice job.

In 426, Lonnie Finch came in first both days, and Rich Beers had the fast time both days. 424 had three fliers very new to racing. Tony Seymore (see pictures) flew the first time around pylons on Saturday, but prior had flown 424, 426, and 1/4 40 airplanes! Seems as if he is already hooked on pylon racing. Roger Burright has been racing for a few years in Wichita and went on to win 424 on Sunday. Mike Ryken was at his second race. Duane Hulen loaned him his 426 airplane, and he flew 426 Saturday and Sunday. The first time he flew a 426 was in the first heat Saturday. He was third in 424 Saturday and two seconds off the fast time in 424 on Sunday. He also had pretty respectable times in 426 both days. Duane says he's hooked. Scott Farnsworth in his third season won 424 Saturday and came in second Sunday. He is also getting pretty good times in 426. Look out for these "new guys"!

Talking about new guys, Tom Melsheimer organized a practice in Muncie the first full weekend in May and two weeks prior to the Muncie

Spring Race. The emphasis was to give "new guys" a chance to fly around the pylons and get tips from experienced racers. He hopes to make this an annual event two weeks prior to the Muncie Spring Race. AMA gives great support, and the flying site cannot be beat! New or experienced, a great idea to make this next year, and maybe another one later this year.

Weather was great Friday with about 15 fliers in attendance. Out of those, 4-5 were brand new or only had a race or two. Tom Melsheimer and Mark Zeil worked on a timing system that requires two workers. It includes a turn light for one lane and timing to tell a pilot lap times and how long they were beyond pylon one and how long beyond 2/3. The system is still being developed, but when done will provide the pilot with a paper slip with all the info from their practice run. This kind of practice is very valuable. There were a lot of experienced racers testing their equipment and helping "new guys." At the end of Friday the start line at AMA site 3 was well oiled. A good sign of plenty of great practice. Pictured is Dan Hiller. Watch this guy move up this year.

Best six district races count toward the perpetual trophies for 424 and 426. The NATS counts as district races. Best of luck to everyone!

Jim Nikodem  
22v

*Roger Burright ready for another race*

## District 6: Peter Tani

Sorry I missed. Better Next Time.

## District 7:

**Scott Smith**

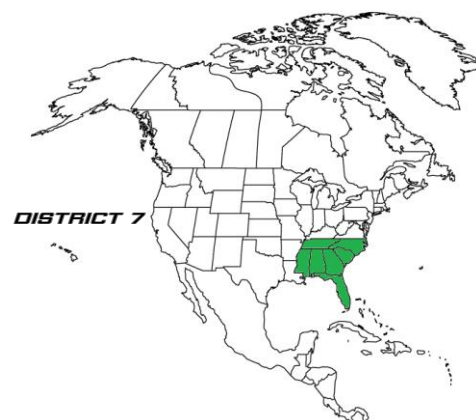

**August 19, 1970 – June 10, 2016**

Rest in peace, my friend. You will be deeply missed in our racing community.

As many of you read on the NMPRA web site, Scott Smith passed away unexpectedly with the actual cause unknown as of June 15th. I received a call from Scott's family early Friday morning with the news Scott had passed away unexpectedly Thursday night. It put me in total shock. Scott and I became very good friends over the years and spoke regularly each week, and he came over to my shop to visit and go to lunch, sharing pylon stories and talk about composite fabrication since he was starting to do some Q40 design and molding.

Those of us lucky enough to know Scott met a man who was dedicated to helping and promoting pylon racing as well as being deeply involved in other segments of RC flying. He never met a stranger. If you had a question or needed help with anything related to model airplanes, he was there. Scott was also a "RC fixture" not only for Mulberry races, but also for other local events including working the flight line for Florida Jets, Top Gun. He also was the SEMPRA President for several years, the NMPRA District 7 VP, key promoter of all Mulberry Races, NMPRA webmaster, and SEMPRA webmaster.

During one of our luncheons, Scott told me he is going to be sure he gets to race in 2016 since he has been too busy over the past several years with the other racing support functions. For relaxation, Scott additionally was an avid fisherman. He would fish

every chance he could for fun or in tournaments with his close friend and son-in-law, Josh.

Fellow racers and families enjoy the time we spend together as we are all **"ON THE CLOCK!"** My prayers and thoughts go to Scott's wife, Brenda, kids, and family.

Gary Freeman, SR

## District 9: Alejandro Vazquez

Hello all racers,

Our great friend "Pepe," Jose Calderon, passed away few weeks ago. Our hobby community is very sad because we lost a good man who loved the pylon races, one of the most enthusiastic pilots. For his Legate and the memories of all the great moments that we share with him, we look forward to be present as always, at big US races as a Mexican team.

The second on board, Salvador Barrios (Chava), of unanimous form has been chosen as the new team manager; he, like Jose, has been our teacher a long time ago. With him at the head, pylon racing in Mexico will have continuity.

One of new traditional races was held at Puebla State this May, the 23th Q500-428 and the 24th Q40-422. They have their own light system, custom made, that works great. Here you go - some pictures and official results. Times looks slow, but take note that Puebla is above 7,300 ft. high.

Hasta la vista,  
Alex
